Morningstar Rating™ The Morningstar Rating™ for funds or star rating is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange traded funds, closed-end funds, and separate accounts) with at least a three year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar RiskAdjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10 % of products in each product category receive 5 stars, the next 22.5 % receive 4 stars, the next 35 % receive 3 stars, the next 22.5 % receive 2 stars, and the bottom 10 % receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three, five, and 10-year (if applicable) Morningstar Rating metrics. The weights are 100% three year rating for 36-59 months of total returns, 60% five year rating/40% three year rating for 60-119 months of total returns, and 60% 10-year rating/30% five-year rating/20% three year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
